IT Operations

Nanyang Technology University

Oct 2022 - Feb 2023

- Provide IT support to approximately 200 Staff and 1,200 Students.
- Set up, operate and troubleshoot IT/AV equipment at the Innovation Port, including microphones, speakers, mixers, projectors, and video walls, ensuring that all equipment is set up and configured correctly.
- Conduct regular maintenance and basic inventory management to ensure equipment is properly accounted for and in good condition.
- Perform software installations, updates, and patches, maintaining compliance with licensing and security regulations.

Power Automate Project:

The manual burden of managing the asset list on Teams during asset deployment, particularly with increasing case volume, was effectively eliminated through an automation solution I introduced. This solution streamlines and accelerates processes, leading to greater efficiency and improved accuracy. By optimizing workflows and reducing manual tasks, it further enhances overall productivity, supporting faster and more effective case resolution.
